

Conveyor Belt

The Conveyor Belt is mounted on an adjustable height mobile stand with swivel casters and locks. The unit is ideal for take-off of extruded profiles of all types. It measures 5.75" wide by 50" long. The Conveyor Belt handles single or multiple strands, tubing, films, or any profiles 5.5" or less in width.

Conveyor Belt

The optional Air Knife Assembly assists in rapidly cooling the extrudate prior to pelletizing or collection. When purchased together, the Air Knife Assembly is mounted to the Conveyor Belt Take-Off.

Optional Air Knife Assembly:

- 6" Air Knife
- Air Filter & Regulator
- Mounting Bracket & Details

It starts with a Brabender®...

...and ends with your success!!
